

MILITARY STABLE BELTS

A GUIDE FOR COLLECTORS

BILL THOMAS

INTRODUCTION

A stable belt is a striped coloured belt worn at times by the armed forces of the United Kingdom, Commonwealth and various other countries. The stripes identify various Regiments and Corps. (In Brazil and Lebanon, they are known as gymnastic belts).

The term "stable belt" originates from when UK cavalrymen would place the surcingle around the waist when cleaning the stables and tending to their horses. In the 1950s they spread to all branches of the armed forces, adding a splash of colour and individuality to the drab khaki working uniforms. Initially they were resisted by many senior officers, who saw them as too individualistic, but they soon became accepted throughout the UK forces - and have now spread to the forces of several other countries. The "gymnastic belt" of some countries now has a similar appearance and use, but the name reflects its origin from physical training equipment.
